

# Google Auth Everywhere

Gorman Christian  
gchristian@d64.org

## GAFE As Truth

- Google is the only place the user password is stored
- Google OU/Groups define user roles

# Authentication Mechanisms

- [SAML](#)
- [SecureLDAP](#)
- [OAuth](#)

# External Tools

- [stunnel](#)
- [OAuth2\\_proxy](#)
- [Vouch](#)

# Security Considerations

- Authorization Cookie duration
- Docker firewall and ip tables
- [docker-simple-firewall](#)
